Election/Restrictions

The claims have been renumbered under Rule 1.26, note there are two claims

51.

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-37, drawn to a method of adjusting the sensitivity of a microbial growth inhibition test.

Group II, claim(s) 38-51, drawn to a method for detecting an antibiotic in a sample.

Group III, claim(s) 52-53, drawn to a method for detecting growth inhibitors in a sample with buffers.

Group IV, claim(s) 54-59, drawn to a method for detecting an antibiotic in a sample.

Group V, claim(s) 60-62, drawn to a test apparatus.

The inventions listed as Groups I-V do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Langeveld (6,867,015) entitled "Rapid Microbiological Test for the Detection of Antibacterial Compounds" teaches detecting antibiotics in samples.

There is no unity of invention because the common technical feature in the above Groups is not novel. Each of the above methods of Groups I-IV are distinct because they have different functions and different method steps.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ralph Gitomer whose telephone number is (571) 272-0916. The examiner can normally be reached on Monday - Friday.
